

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## PILOT'S REPORT FOR PORT JACKSON.

### EXPLANATION OF GENERAL SIGNALS.

A red flag denotes a strange barque; with a blue cross, a Government barque; red and blue perpendicular, a private Colonial barque; red and blue diagonal, a Foreign barque.

When a vessel is first sighted, the direction from which she is approaching is indicated by hoisting a ball at the north or the south yard-arm, as the case may be.

The place from which any vessel arrives is signalled as soon as it can be ascertained, and before she enters the port; the entrance of the vessel into port is denoted by hauling down the ball at the yard-arm; and her anchoring by lowering the whole of the flags.

A ball hoisted at the mast-head indicates that the vessel last signalled is passing the port.

An immigrant ship is denoted by the numeral pendant being hoisted over the numerical flags. When troops are on board, the numeral pendant is hoisted under these flags. When a vessel returns to port, the white substitute is hoisted under the descriptive flag. When the Governor arrives, the Union Jack is hoisted at the semaphore mast-head.

Foreign National flags on the semaphore mast-head denote the country of the ship signalled.

### MAIL STEAMERS.

When the Mail Steamer arrives at Adelaide, the Company's flag with a ball over it, is hoisted at the semaphore mast-head, and kept flying one hour; when she arrives at Melbourne, the same flag with a ball under it is kept flying one hour. Her approach to Sydney is indicated by hoisting the Company's flag over the numerical flags, denoting the stations from which she is observed.

When a ball is placed between the descriptive flag and the numerical flags, it denotes that the vessel signalled is a Mail Steamer.

The arrival of the P. and O. and other Companies' steamers is indicated by the respective Companies' flags being hoisted on the semaphore yard-arm.

The arrival of a steamer of the A.S.N. Company's fleet is shown by hoisting her particular number under the Company's flag.

### TIME BALL.

The Time Ball at the Sydney Observatory is dropped every day at 1 p.m. Observatory Mean Time, or 14h. 55m. 14s. Greenwich Mean Time.

Should any error occur in the time of dropping the Ball, it will immediately be raised half mast-high, and notice of the amount of error given in the newspapers of the following day.

Pull up forward crops of keeping onions, and stop shoots of pumpkins, vegetable marrow, cucumbers, &c. Water plants that have lately been put out, seed beds, and young seedlings.

Shade delicate plants from the scorching mid-day sun.

**KITCHEN GARDEN.**—If you have any large cabbage plants in seed beds, plant them out in rows. Plant also culinary herbs. Earth up your celery as required. Continue to sow peas, broccoli, lettuce, onions, turnips, radish, beans, cabbages. Dress all your beds, thinning out carrots, turnips, parsnips, &c.; and at your vacant time prepare new beds, trenching and manuring all unoccupied ground.

**FLOWER GARDEN.**—Plant different kinds of bulbs, such as tulips, &c. Flowering shrubs and herbaceous plants may be propagated and transplanted. When tender plants have to be removed, keep as much earth about the roots as possible. This is a good month for making edges round borders. Box, lavender, thyme, daisies, sea pinks, &c., make very nice edgings; but when these cannot be carried out in sufficient quantities, a good border of turf looks very well, but it must always be kept very clean and well trimmed.

**ORCHARD AND FRUIT GARDEN.**—Plant raspberry, gooseberry, strawberry, and currants. Gather all ripe fruit. In pruning raspberries all the old stems that produce fruit this summer must be taken out.

**FIELD OPERATIONS.**—Sow wheat, barley, and oats. The tobacco crop should be carefully watched, and cut as it becomes ripe.

**KITCHEN GARDEN.**—Sow peas, beans, cabbages, cauliflowers, radishes, endive, carrots, parsnips, turnips, rhubarb, spinach. Plant potatoes, celery, in trenches to blanch (earthing it up gradually), eschalots, cabbages, and cauliflowers. Clean and thin beds. Stop superfluous shoots of cucumber, pumpkin, &c. The routine for October, November, and December, is very much the same, both for the kitchen and the flower garden. At this season two things require to be constantly borne in mind, weed well, and water well.

**FLOWER GARDEN.**—Plant fall hardy kinds of annuals and dahlias for succession. Take up and dry bulbs. Shade and water as required.

**ORCHARD AND FRUIT GARDEN.**—Let the grapes receive great attention. Secure trees planted in the autumn from being shaken by the winds; destroy all insects; remove suckers; thin fruit, and gather as they ripen.

**FIELD OPERATIONS.**—Top tobacco, removing all side shoots, and those that hang on the ground, leaving from eight to twelve, according to the size and strength of the plant. Earth up maize and potatoes. Attend to and regulate cotton plants. The harvest should be general this month.

## New South Wales.

---

THIS name was originally given to the whole of the eastern division of Australia by its first explorer, Captain Cook, who, when examining the coast on his first voyage in 1770, thought it resembled that of South Wales. Its territory originally embraced all the country from Cape York, in the latitude of  $10^{\circ} 37'$  south, to South Cape, in the latitude of  $43^{\circ} 29'$  south, including the adjacent islands in the Pacific Ocean within the latitude above mentioned, and inland to the westward as far as the  $135^{\circ}$  of east longitude. Since the foundation of South Australia, on 26th December, 1836, and the separation of the colonies of Victoria and Queensland—the former of which was declared independent on the 13th of January, 1851, and the latter on the 10th of December, 1859, the territory of New South Wales is limited to the country between the parallels of  $28^{\circ}$  and  $37^{\circ}$  south latitude, and between the 141st and 154th meridians of east longitude, being bounded on the north by Queensland, on the south by Victoria, on the west by the interior territory of South Australia, and on the east by the Pacific Ocean.

The greatest length of New South Wales is 900 miles, and is measured on a line drawn from Point Danger to the point where the meridian of  $141^{\circ}$  E. intersects the course of the Murray River; but the average length does not exceed 500 miles. The extreme breadth measured from Cape Howe to the point of intersection of the parallel of  $29^{\circ}$  S., with the 141st meridian, is less than 850 miles, and the average breadth is about 500 miles. New South Wales is supposed to contain an area of about 325,000 square miles.

The first Governor of New South Wales was ARTHUR PHILLIP, R.N., who arrived at Botany Bay in H.M.S. *Sirius*, along with three storeships and six transports, on the 20th January, 1788, where they anchored, and, finding that Botany Bay was not a suitable place for the new settlement, proceeded to examine Port Jackson.

On the 26th January, 1788, the British ensign was, for the first time, hoisted on the solitary shores of Sydney Cove, now the seat of Government, and capital of New South Wales.

The city of Sydney, the capital of New South Wales, is situated in the county of Cumberland in  $33^{\circ} 55'$  south latitude, and  $151^{\circ} 25'$  east longitude, and stands at the head of Port Jackson, about six miles from its entrance. Its population, including the suburbs, at the last census taken, 1871, was 136,483. The principal other towns of the colony, with their population, government officials, &c., will be found under the heading of "Country Directory."

The following is a list of the Governors of New South Wales, showing the date on which they assumed and retired from the Government :—

#### REGULATIONS FOR THE ADMISSION OF INSANE PERSONS INTO LUNATIC ASYLUMS.

1. The attention of persons applying for the admission into a Lunatic Asylum under the 11th section of the Act 7 Victoria, No. 14, of persons of unsound mind, is requested to the provisions contained in the Act 13 Victoria, No. 3, that in cases where the insane person has no relative or guardian in the colony, or none accessible, without inconvenient delay, any person or society, under whose protection and care such insane person shall actually be, shall be deemed the guardian for the purposes of the first mentioned enactment.

2. Every application of the above description must be from one of the relatives or guardians of the lunatic, in the form annexed (A), which must be sanctioned by one of the Judges of the Supreme Court. For this purpose the application must be taken (or sent) to the Prothonotary of the Court, or one of the Judges' Clerks; and the attention of applicants is invited to the recent rules, made by the Supreme Court (which are published herewith for more easy reference), respecting an additional certificate from each of the medical practitioners, in support of the application, for the Judges' approval.

3. A certificate must be attached to the petition, in the form hereto annexed, (B), signed by two legally qualified medical practitioners, stating that they have examined the persons, and found him or her to be of unsound mind, and that they consider such person will be benefitted by treatment in a Lunatic Asylum.

4. In all applications of this nature, the relationship in which the applicant stands to the lunatic must be stated; but, in cases where the lunatic has no accessible relative or guardian, the application may proceed from the principal Officer of any Public Charity, or the Gaoler, or other person (master or friend), under whose actual protection and care the lunatic is, stating the fact, as the case may be.

5. The application, when sanctioned by one of the Judges, is to be forwarded to the Colonial Secretary.

6. The charge for the maintenance, in a Lunatic Asylum, of a lunatic, male or female, is two shillings and twopence per diem; and, except in the case of a pauper,

the person seeking the lunatics' admission, will be required to furnish to the Superintendent, of the Lunatic Asylum, an engagement from two responsible persons for the regular payment of this sum.

7. If the application be for the admission of the lunatic as a pauper, a certificate will be required from some respectable person known to the Government, to the effect, not only that such lunatic is without funds, but is also without friends who can reasonably be expected to maintain such lunatic.

(A.)

(Form of Petition to His Excellency the Governor.)

To His Excellency the Right Honorable Sir Hercules G. B. Robinson, K.C.M.G. Governor of the Colony of New South Wales.

The Petition of (G.H.) of (state residence and trade or calling).

Respectfully sheweth, that (A.B.) of (state residence and trade or calling) has been examined and found to be of unsound mind, as will appear by the annexed certificate; and that your petitioner, who is the father (or other relative or guardian) of the said (A.B.) is desirous of procuring (his or her) admission into a Lunatic Asylum, in order that (he or she) may there have such medical care and attendance as may be most likely to insure (his or her) eventual recovery. If the petitioner be not a relative or guardian, say, instead of the words "who is the father, &c." as follows:—"who has the actual protection and care of the said A.B., and is therefore (his or her) guardian, under the 13th Vic., No. 3, Sec. 2, is desirous, &c."

(And any circumstance requiring explanation, and whether the insane person is proposed to be maintained by the petitioner or by the public.)

Your petitioner therefore prays that your Excellency will be pleased to direct that the said (A.B.) may be received into such Lunatic Asylum, as your Excellency may think fit to appoint.

Note.—If the insane person is sought to be admitted at the public cost, the following certificate should be added.

I, (J.K.) of (state residence, &c.) do hereby certify that, to the best of my knowledge and belief (A.B.), who is described in the foregoing petition, has not the means of paying for (his or her) maintenance in a Lunatic Asylum and that (he or she) has not any relative or friend who can be reasonably expected to maintain (him or her).

(Signed) (J.K.)

If the application proceeds from a near relative, such as a husband, a father, &c. the certificate must be as follows:—

I, (J.K.) of (state residence, &c.) do hereby certify, that, to the best of my knowledge and belief, neither (G.H.) or (A.B.), who are described in the foregoing petition has the means of paying for the maintenance of (A.B.) in a Lunatic Asylum and that (A.B.) has not any relative or friend who can be reasonably expected to maintain (him or her).

(Signed) (J.K.)

(B.)

(Form of Medical Certificate.)

We, the undersigned, being legally qualified medical practitioners, do hereby certify, that we have examined (A.B.) of (state residence, trade or calling, &c.) and that we find (him or her) to be of unsound mind, and a proper object for reception into a Lunatic Asylum; and we further certify, that in our opinion the said (A.B.) would be benefited by treatment in such Asylum.

(Signed)

1. No order will hereafter be made under the 7th Victoria, No. 14, sec. 11. and 13th Victoria, No. 3, sec. 2, sanctioning the admission of any person into a Lunatic Asylum, unless each of the medical practitioners, signing the certificate in the form now required, shall also sign a separate certificate, to be annexed thereto, in the form hereunder written, and containing the particulars therein indicated.

2. Every application for a commission *de lunatic inquirendo*, shall be accompanied by separate certificates to a like effect.

3. No certificate will be received from any Practitioner keeping, or in any manner interested in, a Lunatic Asylum, directly or indirectly,

## Ecclesiastical Lists.

### CHURCH OF ENGLAND—

The Rev. Mr. Johnson was the first Chaplain that arrived in the Colony. In March 1794, he was joined by the Rev. Samuel Marsden, long remembered and celebrated for a lifetime of evangelistic spirit and missionary labour, both here and in New Zealand, to which place he took no less than seven voyages. Shortly after the arrival of Mr. Marsden, the senior Chaplain, Mr. Johnson, returned to England, so that for a long time he laboured here alone.

The first Archdeacon the Rev. Thomas Hobbs Scott, arrived May 7th, 1825. He was succeeded by the Venerable Archdeacon Broughton, who arrived on September 13th, 1829, and who, on the erection of Australia into a See, in 1836, was created Bishop. He died in 1854, when he was succeeded by the Rev. Dr. Barker. In 1841. Bishopricks were erected in New Zealand; 1842, Tasmania; 1847, Newcastle, Adelaide, Melbourne; 1850, Lyttleton, Western Australia; 1853, Wellington, Nelson; 1859, Queensland, 1864, Goulburn, Grafton and Armidale; 1869, Bathurst.

THE PRESBYTERIAN CHURCH OF NEW SOUTH WALES.

The first Presbyterian Minister who arrived in the colony was the Rev. Dr. Lang, who preached his first sermon June 8th, 1823. He laboured alone till 1831, when, in consequence of his exertions, five others were added. Since that time till 1840, various others arrived; and the Presbyterian Church having previously existed in a disunited state, it was then united and formed into the Synod of Australia. Two secessions have taken place since, viz., that of Dr. Lang in 1842, and that of the Synod of Eastern Australia, in 1846, the latter of whom separated on free Church principles.

In November, 1864, a union took place between the Synod of Eastern Australia and the Synod of New South Wales, the new body assuming the name of the Presbyterian Church in New South Wales.

In October, 1865, there was a general Union of the Presbyterians, embracing the Synod of Australia in connexion with the Church of Scotland, the Presbyterian Church in New South Wales, the United Presbyterian Church, and various other ministers and congregations who had previously occupied isolated and independent positions, the title given to the new body being "The Presbyterian Church of New South Wales."

The General Assembly is appointed to meet in the Presbyterian Church Phillip-street, Sydney, on Tuesday the 28th October, 1873, at seven o'clock p.m.

*Moderator of Assembly*—Rev. John Dunmore Lang, D.D.

*Clerk of Assembly*—Rev. James B. Laughton, B.A., Parramatta.

*Agent of the Church*—Rev. Adam Thomson, 241 Macquarie-street.

**AUSTRALIAN WESLEYAN METHODIST CHURCH.**

The Rev. Samuel Leigh, the first Wesleyan Minister in New South Wales, arrived in 1816; he was joined in 1818, by the Rev. Walter Lawry. The Wesleyan Mission Stations in Australasia were formed into a separate but affiliated Conference in 1854, the first of which was held in Sydney, in January, 1855. This Church has extensive Missions in New Zealand, Tonga, Fiji, and Samoa. These Missions are under the management of a Committee appointed by the Conference. The Mission ship, John Wesley, is under the direction of the Executive Committee, which meets in Sydney. Auxiliary Societies are established in all the Colonies, and branches in all the circuits.

*Chairman* for 1872-73—Rev. T. S. Forsaith.

The first Congregational Church in this colony was erected in 1834, in Pitt-street. In 1840 the Rev. Robert Ross, M.D., arrived, and under his earnest and efficient ministry the Church steadily increased, so that in due time other Churches were formed, both in the suburbs of Sydney and the country districts.

## ECCLESIASTICAL LISTS.

In 1866 meetings were held, which led to the formation of a Congregational Union for New South Wales, the first officers being—Chairman, Rev. J. Graham; Treasurer, J. Fairfax; Secretaries, Rev. J. E. Vetch, B.A., and Randolph Nott. This Union adopted for its fundamental principle that of the Congregational Union of England and Wales.—“That the Union of Congregational Churches is founded on a full recognition of their own distinctive principle,—namely, the scriptural right of every separate Church to maintain perfect independence in the government and administration of its own particular affairs, and therefore that the Union shall not in any case assume legislative authority, or become a Court of Appeal.”

The Union holds its meetings twice every year—April and October; the October meeting being held always in Sydney.

## BAPTIST UNION OF NEW SOUTH WALES.

*Chairman for 1872-73*—Rev. Allan Webb

*Treasurer*—J. Bubb

*Secretary*—Rev. George Sheppard, B.A.

The Bathurst-street Church is the oldest in the colony and was erected in 1837. The first minister was the Rev. John Saunders. He held the pastorate for nearly fourteen years. His successors have been the Revs. J. Ham, and J. Voller.

An association was formed in February, 1868, and this was superseded by a Union having a wider doctrinal platform in 1870. The basis of this Union is the Bible only, and its objects are to promote brotherly love, originate Baptist Churches, and help necessitous ones.

The designations which distinguish the Baptists in England as Particular and General are in this Union merged in the appellation "Baptist." With this Union, without respect to minor doctrinal divergencies, nearly all the churches have become identified.

The Baptist Churches not in the Union are marked with an asterisk (\*).

The Union meetings are held in September and March, the September meetings being always in Sydney.

## Educational Establishments.

### UNIVERSITY OF SYDNEY.

The University of Sydney was incorporated by an Act of the Colonial Legislature, which received the Royal Assent on the 9th December, 1851. It is empowered to confer degrees in Arts, Law, and Physic; and is endowed with an annual income of £5000.

By a Royal Charter, issued 17th February, 1858, the same rank, style, and precedence were granted to graduates of the University of Sydney, as are enjoyed by graduates of Universities within the United Kingdom. The University of Sydney is also declared in the amended Charter granted to the University of London, to be one of the institutions in connection with that University, from which certificates of having pursued a due course of instruction shall be received, with a view to admission to degrees.

The Hall is an imposing room in the style of the 15th century. It is 135 feet long, 45 feet wide, 73 feet high. The richly carved open roof is of colonial wood—cedar and ironbark. The stained glass windows are by Clayton and Bell of London. At the eastern and western ends are two (each of fourteen lights), containing portraits of founders of Colleges in Oxford and Cambridge. The northern bay-window represents all the sovereigns of England, from the conquest. The side windows (eleven in number), of three lights each, represent, in a chronological series, men distinguished in English History for literature or science, from the eighth to the eighteenth century—the first portrait being that of the VENERABLE BEDE, the last, of CAPTAIN COOK. In the northern and southern entrance halls are heraldic windows by the same artists. All the stained glass is the gift of individuals.

There is a valuable Museum of classical and Egyptian antiquities, presented chiefly by Sir Charles Nicholson, Bart. The Library contains several rare and interesting books: amongst them a copy of the recently discovered *Codex Sinaiticus*, presented by the Emperor of Russia; and one of the Prince Consort's Speeches, with Her Majesty's autograph on the fly-leaf.

### BOURKE.

This district embraces the eastern portion of the pastoral district of Albert, the western and southern portions of Warrego, and the northern portion of Wellington. Owing to the absence of mountains in these parts of the interior, the want of rain is frequently felt severely, which renders this district only fit for pastoral purposes, nevertheless, although it was long regarded as in the unknown interior, it is now becoming rapidly populated, and the resources developed to such an extent as to lead to the conclusion that a large and flourishing population will, ere long, find happy homes on the banks of the Darling. This is more likely to be the case now, as within the two last years the district has been discovered to be rich in metals. Copper has been found of a remarkably rich character, and in great abundance, and the quartz reefs which are visible in many parts of the district have been found to contain gold. Registration—Births, 52; Marriages, 11; Deaths, 21. Population, 1,092 males, 416 females; total, 1,508. Public houses, 19. This district is partly in the electoral district of the Bogan, and partly in Balranald.

#### TWEED RIVER.

Embraces the north-eastern portion of the pastoral district of the Clarence. It was, until recently, only known as a timber producing district, from which Sydney obtains large supplies of building material. In about the year 1866 free-selectors began to take up the land, and, in the course of three years afterwards, all the good land on navigable water was free-selected; at the present time there are about 28,000 acres alienated by conditional purchase. The district is admirably adapted for the growth of the sugar cane. Good judges say its rich river flats and splendid climate place it amongst the most desirable spots on the eastern coast for the cultivation of the sugar cane. Owing to the very low price of maize there will not be more than 300 acres planted with that crop this year; all who have the means are planting the sugar cane. Registration—Births, 17; Marriages, 0; Deaths, 2. Population last census—277 males, 172 females, total 449. About 600 acres of land have been leased here for the purpose of working a quicksilver mine, in which mineral it is supposed to be very rich. Two gold reefs also are just on the point of being opened, very rich specimens having been obtained from them. This district forms part of the Electorate of the Clarence. (See Grafton.)

### Tasmania.

The Island of Tasmania lies between 14° 29' and 43° 40' S. lat., and 144° 40' and 148° 20' E. long., and contains 15,232,000 acres of land.

The first discovery was by the Dutch Navigator, Abel Jansen Tasman, on the 1st December, 1642, who gave it the name of Van Dieman's Land, in honor of the Governor of the East Indies; but the name of Tasmania, in honor of the discoverer, is officially used. Captain Cook visited the Island on the 25th of January, 1777. Captain Flinders made the discovery in 1798 that Tasmania was an Island, and called the Straits separating it from Victoria after his adventurous companion, Dr. Bass. It was in 1804, under Colonel Collins, that the first settlement on its shores was formed. The physical aspect of the country is mountainous. It abounds in rivers and lakes, three of the former being navigable for vessels for 40 miles. On the principal one, the Derwent, the capital is situated. Many of the mountains are of a great height, that of Cradle Mountain is 5,089 feet above the level of the sea, and Valentine's Peak, 3,637 feet is visible at a distance of 60 miles. The capital is Hobart Town, and the other principal towns are Launceston, New Norfolk, Westbury, Deloraine, Campbelltown, Ross, Kempton, and Richmond.

## *South Australia.*

---

The boundaries of this colony are fixed between 132° and 141° E. long. for the eastern and western boundaries; the 26° of S. lat. for the northern; and on the south by the Southern Ocean. The coast line extends 1,600 miles, embracing an area of about 300,000 square miles. It was founded on the Wakefield principle, and for some time seemed to disappoint the expectation of its projectors. It has, however, after passing through many vicissitudes, attained an important position among the Australian colonies. Captain Hindmarsh, the first Governor, arrived at

the close of 1836, and the colony was proclaimed on the 28th December of that year. He was succeeded by Colonel Gawler, who arrived on the 12th October, 1838. Since it was founded, it has steadily progressed in population, value, and importance to the present time, while the navigation of the Murray and the Darling (New South Wales) tends still further to advance its prosperity.

The Capital of South Australia is Adelaide, and the other principal towns are—Gawler Town, Kapunda, Koorunga, Kadina, Moonta, Wallaroo.

This colony is situated in the south-eastern part of Australia; between lat. 34° and 39° S.; and long. 141° and 150° E.; bounded N.E. and N. by New South Wales, W. by South Australia, and S. by Bass' Straits. Its area is 86,944 square miles, or 55,844,160 acres. Until 1850 it was known as the Port Phillip District, forming the southern portion of New South Wales, and was erected into a separate colony on the 13th January, 1851. The discovery of gold has drawn to this colony an enormous multitude of immigrants, so much so that it has developed its natural resources to an extent altogether unparalleled. The length of the sea coast is about 600 miles.

The capital of Victoria is Melbourne. Population, exclusive of suburbs, 50,000. ## ENGLAND—THE CENSUS OF 1871.

From the population enumerated at the Census on April 3, 1871, we learn that, notwithstanding the constant flow of emigrants from our shores, numbering, 605,65 of English origin in the ten years 1861-1870, the population has increased no less than 2,637,884. The actual enumeration of the Census affords a perfectly reliable basis for the calculation of the per centage of mortality, and serves to correct the estimate for places which during the last decade have exhibited an unusual rate of increase or fluctuation in the population.

The resident population of the United Kingdom in the middle of 1871 is estimated at 31,529,496: that of England and Wales amounting to 22,760,359, of Scotland to 3,366,378, and of Ireland to 5,402,759.

ARE warranted not to contain a single particle of MERCURY or any other MINERAL SUBSTANCE, but to consist entirely of Medicinal Matters, PURELY VEGETABLE; hence, they are easily digested by the Stomach, taken up by the absorbent vessels, and carried into the blood; and thus the whole system is brought under their Purifying and Renovating Influence.

They have long since been used in one of the largest County Hospitals in Great Britain, and received the commendation of several eminent Physicians and Surgeons; and have proved their value in thousands of instances in diseases of the head, Chest, Bowels, Liver, and Kidneys; and in all Skin Complaints.

## AUSTRALIAN OINTMENT.

THE undersigned finding it impracticable for him to meet single-handed the largely increased demand for the manufacture and supply of the Australian Ointment, has this day **DISPOSED** of the Patent to Messrs. EDWARD ROW and CO., Wholesale Druggists, Pitt-street, whose appliances will enable them to conduct the manufacture on a sufficiently extensive scale to avoid in future the inconvenience and annoyance of purchasers having to wait for their supplies.

5th September, 1871.

I. J. JOSEPHSON.

### *THE AUSTRALIAN OINTMENT (Patented.)*

This extraordinary preparation continues to display the most wonderful healing properties in all cases of SORES, WOUNDS, Bruises, SCALDS, BURNS, ABRASIONS, CHILBLAINS, SOFT CORNS, SORE EYES, DEAFNESS, &c., and no house in the colony, no traveller, no warehouse, no manufactory should be without it. It affords instant relief, and effects the most rapid cures. Purchasers should be particular in asking for the AUSTRALIAN OINTMENT—see that it is of a pale (purely vegetable) green. Each wrapper bearing the signature of the discoverer, I. J. Josephson, and of the manufacturers and proprietors. Price, 1s. 6d. retail.

### **The Greatest Medical Discovery of the present Age is the *Australian Ointment*;**

which has now been before the public of New South Wales for many years, and continues to create constantly for itself fresh praise and recommendation by all who use it.

For all kinds of external applications such as old wounds, chafings, sunburns, cracked lips and hands, sore heads, soft corns, excoriations, &c.

Being made from the wild plants of the Australian forest, it is perfectly free from all poisonous chemicals which form the basis of preparations of this kind.

Staffordshire Warehouse, Sydney, 21st August, 1872.

Dear Sir,—I cannot allow this opportunity to pass without bearing testimony to the wonderful properties of your AUSTRALIAN OINTMENT, a pot of which I obtained, and on one application of the same to some severe contusions on my forehead occasioned by a fall, a cure was effected in a few hours, and the skin as perfect as before injury. I feel so thankful at the result that I make this acknowledgment, and you are at liberty to make use of this in any way you think proper.

I am, dear Sir, yours respectfully,

To Mr. Edward Row.

GEORGE LANE.

In consequence of the great demand and constantly increasing sale the proprietors wish now to inform the public they have reduced the price of this preparation as below.

Sold by all Chemists and Druggists, Storekeepers, &c., in pots, 1s. each, and covered pots 1s 6d and 2s 6d each, retail and wholesale, by the proprietors.
